

Hydrogen-Electric⁺

Continuous emission-free working

Introducing Hydrogen-Electric from Niftylift

Working in harmony with Niftylift All-Electric MEWPs, this revolutionary new zero-emission technology enables continuous operation when charging facilities aren't available.

Niftylift All-Electric MEWPs are clean, quiet and super-efficient. They deliver market-leading reach performance from a compact, manoeuvrable and low-weight chassis.

They include innovative features such as:

- Zero-emission operation
- Significantly reduced lifetime costs
- AGM maintenance-free batteries
- Onboard diagnostics
- Complete battery monitoring & protection
- Multi-award-winning SiOPS®
- Niftylink® advanced telematics

Niftylift Hydrogen-Electric provides an emission-free solution for extending runtime when charging facilities aren't available.

The Hydrogen Fuel Cell fully charges the batteries from a G20 Hydrogen bottle, doubling the already-impressive range.

The G20 bottle is quick and easy to replace and provides a convenient, clean and repeatable on-site solution that helps offset operational net-zero targets.

So choose **Hydrogen-Electric from Niftylift** to future-proof your ESG strategy and continue your net-zero journey with us.
